

mgiankos

I am a passionate and driven individual who is motivated by problem solving, breaking new ground, and embracing challenge. I have sought out and thrived in challenging situations, from competing professionally as a world class Freediver and Spearo to creating and directing the business operations of the flourishing organizations, Freediving Spearfishing WorldWide and Spearfishing Instructors. In the past 20 years I have trained and certified thousands of athletes, recreational freedivers/ spearos and freediving/spearfishing instructors alike in many dive locations around the world.

- 1997 - 5th place teams National championship (Paliouri - Chalkidiki)

Athletic Achievements

I am the founder and Educational Officer of Spearfishing Instructors (SI). SI is an established global Spearfishing Education Organization; it is the first ever of its kind, specialized, strictly Spearfishing Education Organization, aiming to provide high quality training and education services to spearos around the world. SI grew out of the passion of a few avid Spearfishing Champions and Freediving Instructors, who are intent on making it possible for anyone to learn how to spearfish.

SI addresses to all levels of spearos, from beginner to advanced. Special stages for VIPs, electronic device applications, competitive spearfishing, deep spearfishing, variable weight use etc., are targeting to cover every need of the modern spearo who wants to rapidly develop in the sport.

In addition to all existing freediving education programs, most of the teaching and training in SII system Alpha-Omega is open water oriented, emphasizing in real action conditions, on boats and in solid safety due to our recently developed "4-diver" and "total safety" safety protocols.

SI Education System is in English (also translated to several languages), aiming to educate spearos all around the world. It is a collection of knowledge, training, teaching and spearfishing experience in all three Oceans the last 30 years!

Educational Organizations

FREEDIVING SPEARFISHING

WorldWide

I am the founder and Head Training Director of Freediving Spearfishing WorldWide. It is an education and training academy with a new and innovative approach to freediving and spearfishing. Based in Athens, Greece, but available globally, our school offers the highest level of freediving and spearfishing education available through passionate and experienced instructors.

Furthermore, Freediving Spearfishing WorldWide trainers and instructors implement training programs for enhancement of aquatic abilities, apnea skills, spearfishing performance and participation in freediving and spearfishing competition events.

In addition to all these, we provide high quality guided experiences specialized on freediving and spearfishing. We give our clients the opportunity to live the adventure of a lifetime by organizing trips all over Greece but also around the globe.

Educational Organizations

What I can offer

I can use and promote your company's equipment/products in all events I partake in.

These include:

Freediving Spearfishing WorldWide and Spearfishing Instructors International training courses: Throughout all activities that I partake in, I can wear clothes and/or equipment that bear your company logo.

YouTube: Two options are available:

I can promote your equipment through my videos that are regularly uploaded on my channel.

I can produce and upload special promotional videos depicting me using your equipment in events or other activities or I can upload promotional videos already produced by your company advertising your equipment and merchandise.

Facebook, Instagram: Once a week I can upload photos, videos, stories or links promoting your products and your company. In addition, I can share and communicate any news (that you send to me) regarding your company.

Videos: I can provide you with raw footage of unique underwater videos in order to make promotional videos for your company (details will be discussed in person).

Expos and events: I can attend expositions and events, in which your company is represented, as a booth guest and/or speaker (details will be discussed in person).

YouTube is a free to use video-sharing service and can be a great space for freediving and spearfishing enthusiasts to discover how to guides, equipment reviews and things they like. One of the main benefits of YouTube is that it has great promotional power. It offers the opportunity to expand and endorse your brand to a number of new subscribers.

YouTube is one of the main tools I use for promoting freediving and spearfishing education.

Social Media Coverage

At least once per week I upload a photo, video or link that promotes me and my sponsors. In my absence (due to professional obligations) authorized personnel keep the accounts updated.

Annually, I am invited to talk at various exhibitions, educational organizations and clubs on matters concerning freediving physiology, freediving and spearfishing techniques, marine electronics applications, safety in the water, and seminars concerning environmental awareness, educational and training techniques.
